XAMUEL ROMERO

Software Developer | Electronics & Communications Specialist
Caracas, Venezuela | (+58) 424-1738755 | xamuelromero.dev2@gmail.com | github.com/xamuelromeroitsu

SUMMARY

Software developer focused on digitizing and optimizing operations through scalable web and mobile applications. I combine technical training in electronics and communications with engineering methodologies to design clean, maintainable architectures and high-performance solutions for production environments.

TECHNICAL SKILLS

- **Frontend:** JavaScript (ES6+), React.js, Vite, HTML5, CSS3, Tailwind CSS.
- **Backend & Cloud:** Node.js, Express.js, Python, RESTful APIs, PostgreSQL, Supabase, Firebase.
- **Architecture & Quality:** Clean Architecture, SOLID Principles, TDD, DDD.
- **Tools & Methodologies:** Git, GitHub, Vercel, Podman, Docker, Notion, Scrum, Kanban.

PROFESSIONAL EXPERIENCE

Engineering Assistant — ARC Comunicaciones C.A.
January 2025 – Present

- Designed and installed zoned public address and radio communication systems, optimizing signal coverage in technical facilities.
- Coordinated cross-functional workflows with maintenance, logistics, and sales teams to improve operational metrics and cost analysis.
- Authored comprehensive technical reports and infrastructure diagnostics to ensure continuous equipment uptime.

Engineering Assistant — Extin Fire Master C.A.
August 2026 – October 2026

- Executed technical inspections and preventive/corrective maintenance on fire control panels, sensors, and alarm systems.
- Configured centralized control systems following strict industrial safety standards.
- Standardized technical service reporting, reducing response times for maintenance incidents.

FEATURED PROJECTS

- **MEC Dental - Medical Manager** : *Clinical management platform for dental laboratories.* Built the end-to-end architecture featuring **Clean Architecture** patterns, **React.js**, **RESTful APIs**, and **PostgreSQL** to streamline patient records, clinical tracking, and appointment scheduling.
- **FujiTech Venezuela** : *Institutional web platform for vertical transportation services and automated quoting.* Architected and deployed a web solution using **React.js**, **Vite**, and **Supabase** with lazy loading, real-time inspection status validation, and automated quote generation.

EDUCATION

- **Higher Technical Degree (TSU) in Electronics & Communications:** UNEFA *(Present, In Progress)*
- **Mobile & Web Application Development with AI:** Instituto Tecnológico Sitio Uno *(Present, In Progress)*
- **Technical Middle Diploma in Electronics:** Escuela Técnica Popular Don Bosco *(September 2023 – July 2025)*

LANGUAGES & COMPETENCIES

Languages: Spanish (Native) | Portuguese (Intermediate B1) | English (Technical / Documentation Proficiency). **Competencies:** Problem Solving | Team Collaboration | Adaptability | Continuous Learning.
